## UNO-DM-3.3/4.0/4.6/5.0

## TL-PLUS-Q

The UNO-DM-TL-PLUS-Q single-phase inverter family, with power ratings from 3.3 to 5.0 kW, is the optimal solution for residential installations.

**From 3.3 to 5.0 kW**

**One size fits all**

The design wraps FIMER’s quality and engineering into a light-weight and compact package thanks to technological choices optimized for installations with different orientation.

All power ratings share the same overall volume, allowing higher performance in a minimum space, and feature dual Maximum Power Point Trackers.

**Easy to install, fast to commission**

The presence of Plug and Play connectors, both on the DC and AC side, as well as the wireless communication, enable a simple, fast and safe installation without the need of opening the front cover of the inverter.

The featured easy commissioning routine removes the need for a long configuration process, resulting in lower installation time and costs.

Improved user experience thanks to the build in User Interface (UI) which enables access to features such as advanced inverter configuration settings, dynamic feed-in control and load manager, from any WLAN enabled device (smartphone, tablet or PC).

**Smart capabilities**

The embedded logging capabilities and direct transferring of the data to Internet (via Ethernet or WLAN) allow customers to enjoy the whole Aurora Vision remote monitoring experience.

The advanced communication interfaces (WLAN, Ethernet, RS485) combined with an efficient Modbus (RTU/TCP) communication protocol, Sunspec compliant, allow the inverter to be easily integrated within any smart environment and with third party monitoring and control systems.

A complete set of control functions with the embedded efficient algorithm, enabling dynamic control of the feed-in (i.e. zero injection), make the inverter suitable for worldwide applications in compliance with regulatory norms and needs of the utilities.

**Energy Viewer**

This new tool allows residential customers to remotely monitor the performance of their own solar plant and provides all information necessary to increase energy self-reliance and self-sufficiency.

**Highlights**

- Wireless access to the embedded Web User Interface
- Easy commissioning capability
- Future-proof with embedded connectivity for smart building and smart grid integration
- Dynamic feed-in control (for instance “zero injection”)
- Remote firmware upgrade for inverter and components
- Modbus TCP/RTU Sunspec compliant
- Lifetime free of charge access to Aurora Vision

- 1) Refer to the document "String inverter – Product Manual appendix" available at [www.fimer.com](http://www.fimer.com) to know the brand and the model of the quick fit connector"
- 2) For UK G83/2 and G98-1 settings, maximum output current limited to 16 A up to a maximum output  $P_{acr}$  of 3680 W and a maximum apparent power of 3680 VA at Rated AC grid voltage.
- 3) The AC voltage range may vary depending on specific country grid standard
- 4) The Frequency range may vary depending on specific country grid standard; CE is valid for 50Hz only

5) As per IEEE 802.11 b/g/n standard

6)  $P_{acr}$  = 4200 W @ 45°C/113°F

7) Further grid standard will be added, please refer to FIMER's Solar page for further details
